Absence from classes, or for ordinary visiting during term time, as it is an evil that is contagious, and one that has no bounds, cannot be allowed. It is very important that the regular study hours should be uninterrupted, and that friends should make calls during recreation hours, or on Saturday, the regular day for recreation. No pupil will be allowed to spend the Sabbath away from the Seminary during term time.

Application for admission and board may he made to the Principal. In case of a failure after an engagement has been made, infor-

mation should be given immediately. It is exceedingly important that every pupil should be present the first day of each term.

Books and Stationery to be had at the Seminary.

COURSE OF STUDY.

The English course will occupy four years; and, should attention be paid to the Languages, a longer term of time will be necessary. Pupils who are young, or have delicate health, cannot expect to complete in a year the course prescribed, and must often remain in the same class two years. Should any young lady find it inconvenient to remain at the Institution during the entire course, her studies can be arranged with reference to her circumstances.

Particular attention will also be paid to Reading, Composition, and Penmanship; and instruction will be given to all the classes in the historic and preceptive portions of the Bible. Pupils will be encouraged to cultivate their intellectual tastes, by familiar reference to standard English Literature.

TERMS AND VACATIONS.

The Academic year is divided into three terms:

Fall term of 12 weeks, to commence on the last Wednesday of August.

Winter term of 14 weeks, to commence on the second Wednesday of December.

Spring and Summer term of 14 weeks, to commence on the second Wednesday of April.

There will be a vacation of *three weeks* at the close of the Fall and Winter terms, and of *six weeks* at the close of the Spring and Summer terms.

TUITION.

In the English branches, including Vocal Music:

Fall Term,	$6,00
Winter and Summer Terms, each	7,00
Latin,	2,00
French,	3,00
Piano,	10,00
Use of Instrument,	2,00
Linear Drawing,	3,00

Instruction will also be given in the different branches of Drawing and Painting.

Each pupil is taxed 25 cents per term for the use of the Library, and 50 cents per term for Lectures to be given during the year.

The bill for English tuition, and one half the board will be expected to be paid *in advance.*

BOARD.

Pupils can board with the teachers, and be under their special care, at the Boarding-House connected with the Institution, at $2,50 per week, including washing.

Fuel and lights an extra charge.

Every article of clothing should be distinctly marked with the owner's name.

VISITING.

It is highly important that young ladies should continue through the term without interruption. Absence from classes, or for ordinary visiting, during term time, as it is an evil that is contagious, and manifestly retards the intellectual progress of the scholar, cannot be sanctioned. It is very important that the regular study hours should be uninterrupted, and that friends should arrange to make their calls in recreation hours. No pupil will be allowed to spend the Sabbath away from the Seminary during term time, except in extraordinary circumstances. Every facility will be afforded for rapid and substantial progress in study; and the patrons of the institution are respectfully solicited to co-operate with the teachers in securing its highest advantages to their daughters and wards.

Application for admission and board may be made to the Principal, Miss M. J. B. Browne. In case of a failure after an engagement has been made, information should be given immediately. It is very important that every pupil should be present the first day of each term.

Books and Stationery will be furnished at the Seminary.

COURSE OF STUDY.

The English course is arranged to occupy four years; and, should attention be paid to the Languages, a longer time will be necessary. *Young* girls, or those with delicate health, cannot profitably complete in one year the course prescribed, and they will find it greatly promotive of intellectual advantage to remain in the same class two years. Too great haste in passing over the foundation studies is felt as a depressing influence throughout the entire course. Should any young lady find it inconvenient to remain at the Institution only for a limited time, her studies will be adapted to her circumstances.

Fourth Class.

Eaton's Arithmetic,
Modern Geography,

All the members of the school attend regularly to Reading, Spelling, Penmanship, Composition and Calisthenics; and regular instruction will be given to each class in the historic and preceptive portions of the Holy Scriptures. It will be also the desire and the aim of the Principal and Teachers of this Institution to stimulate all their pupils to a high cultivation of their intellectual tastes, by familiar association with standard Literature. The more advanced pupils give special attention to the study of English Literature, as well as to some of the general principles of Art.

The above course is arranged to occupy three years.

TERMS AND VACATIONS.

The Academic year is divided into three terms, viz:

The Fall term of 12 weeks, commences on the last Wednesday of August.

The Winter term of 14 weeks, commences on the second Wednesday of December.

The Spring and Summer term of 14 weeks, commences on the first Wednesday of April.

There is a vacation of *three weeks* at the close of the Fall and of the Winter terms, and of *six weeks* at the close of the Summer term.

TUITION.

In the English branches, including Vocal Music:

Fall Term,	$7.00
Winter and Summer Terms, each,	8.00
Latin,	2.00
French,	3.00
Piano,	10.00
Use of Piano, one hour each day,	2.00
Linear Drawing, or Crayoning,	4.00

Instruction will also be provided in other branches of Drawing and Painting.

Each pupil is taxed 25 cents per term for the use of the Library, and 50 cents per term for Lectures delivered to the Members of the Institution.

BOARD.

Pupils can board at Smith Hall, connected with the Institution, and be under the special care of the Teachers, at $2,50 per week, including washing.

Fuel and lights are an extra charge.

Every article of clothing *should be distinctly marked* with the owner's name.

Carpets are not provided for the rooms at the Hall. Each young lady furnishes her own towels and table napkins.

The whole tuition bill and *one-half the bill for board*, are to be paid *in advance*.

It is the aim of this Institution not only to develop and invigorate the *intellectual* growth, but also to refine and soften the *manners*, cultivate the *moral affections*, and mould into symmetrical proportion the entire character of those young ladies who avail themselves of its advantages.

The importance of uninterrupted regularity on the part of young ladies in School, cannot be over-estimated. The standard of attainment is high, and absence from a single recitation is a *misfortune*. Ordinary visiting, as it has a tendency to distract attention, and is also of a very contagious nature, manifestly retards the intellectual advancement of the scholar, and cannot be sanctioned.

The doors of the Recitation Rooms are *at all times* open to the friends of the young ladies; but it is expected that the regular study hours should be uninterrupted, and calls can be received only on Saturday, or in daily recreation hours.

No visiting at the Smith Hall is allowed on the Sabbath.

Every facility will be afforded for rapid and substantial progress in study; and the patrons of the Institution are respectfully solicited to co-operate with the Principal and Teachers in securing its highest advantages for their wards and daughters.

Application for admission and board may be made to the Principal. In case of a failure after an engagement has been made, information should be given immediately. Every pupil should be present the first day of each term.

The Annual Examination will take place the last Tuesday and Wednesday of the Summer Term.

Books and Stationery furnished at the Institution.

APPENDIX.

Pupils are classified by examination. The point to be ascertained is not what or where one has studied, but what she really knows. We believe that the mind is most successfully and healthfully developed by exercise in the varied departments of science. Hence, whether pupils are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of their teachers.

Instruction is regularly given in Reading, Spelling, Penmanship, and Calisthenics. One day in each week is devoted to English Composition and general exercises in Mental Arithmetic, Parsing, Geography, or History. With these are combined reports upon miscellaneous topics previously assigned, whose object it is to promote general intelligence, and to establish habits of investigation.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History and the Latin.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who expect to be connected with the School for any considerable time, should be present consecutive terms if possible.

The importance of prompt attendance, and uninterrupted regularity at School, cannot be over-estimated. Absence from a single recitation is a misfortune.

The friends of the Academy will always be welcome at our recitations. The members of a school have no time for general society, as it would interfere with the prime object of their association. The young ladies at Smith Hall are at leisure to receive their friends upon Wednesday, which is their recreation-day, and at any other times excepting study-hours. Every evening has its engagement.

The Sabbath will be observed as in any other Christian family. Calls will neither be made or received on that day. Unless Providentially called away, no young lady will be absent from her home here a single Sabbath during the term. Excitement and change of scene are opposed to that quiet thoughtfulness which belong to holy time.

It is our effort so to educate girls that they may bring a vigorous and accomplished mind in a healthful body to the work of life, and above all, so that whatever of grace or power is in them may be consecrated to Him whose it rightfully is. This culture is more hopefully undertaken with those pupils who are associated with their teachers in the same family.

COURSE OF STUDY IN LATIN AND FRENCH.

Any one completing the course in either language will receive a testimonial to that effect in her diploma.

APPENDIX.

It is our effort so to educate girls that they may bring a vigorous and accomplished mind in a healthful body to the work of life, and above all, so that whatever of grace or power is in them may be consecrated to Him whose it rightfully is.

We believe that the mind is most successfully and healthfully developed by exercise in the varied departments of science. Hence, whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of their teachers.

Pupils will be examined so far as may be necessary for proper classifications. The point to be ascertained is not what or where one has studied, but what she really knows.

Instruction is regularly given in Reading, Spelling, Penmanship, and Calisthenics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

One day in each week is devoted to English Composition, and general exercises in Mental Arithmetic, Parsing, Geography, or History. With these are combined reports upon miscellaneous topics previously assigned, whose object it is to promote general intelligence, and to establish habits of investigation.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who expect to be connected with the School for any considerable time should be present consecutive terms.

The importance of prompt attendance, and uninterrupted regularity at School, cannot be over-estimated. Absence from a single recitation is a misfortune.

The friends of the Academy will always be welcome at our recitations.

Young ladies from abroad will find pleasant accommodations with their teachers at Smith Hall. The members of a school have no time for general society, as it would interfere with the prime object of their association. The young ladies at Smith Hall are at leisure, however, to receive their friends upon Wednesday, which is their recreation-day, and at any other times, excepting study hours. Every evening has its engagements.

The Sabbath will be observed as in any other Christian family. Calls will neither be made nor received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term. Excitement and change of scene are opposed to that quiet thoughtfulness which belongs to holy time.

APPENDIX.

It is our effort so to educate girls that they may bring a vigorous and accomplished mind in a healthful body to the work of life, and, above all, so that whatever of grace or power is in them may be consecrated to Him whose it rightfully is.

We believe that the mind is most succesfully and healthfully developed by exercise in the varied departments of science. Hence, whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of their teachers.

Pupils will be examined so far as may be necessary for proper clasifications. The point to be ascertained is not what or where one has studied, but what she really knows.

Instruction is regularly given in Reading, Spelling, Penmanship, and Calisthenics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

One day in each week is devoted to English Composition, and general exercises in Mental Arithmetic, Parsing, Geography, or History. With these are combined reports upon miscellaneous topics previously assigned, whose object it is to promote general intelligence, and to establish habits of investigation.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who expect to be connected with the School for any considerable time should be present consecutive terms.

The importance of prompt attendance and uninterrupted regularity at School cannot be over-estimated. Absence from a single recitation is a misfortune.

The friends of the Academy will always be welcome at our recitations.

Young ladies from abroad will find pleasant accommodations at Smith Hall with their teachers, whose care it will be not only to make them happy, but to cultivate in them ladylike habits. The members of a school have no time for general society, as it would interfere with the prime object of their association. The young ladies at Smith Hall are at leisure, however, to receive their friends upon Wednesday, which is their recreation-day, and at any other times, excepting study hours. Every evening has its engagements.

The Sabbath will be observed as in any other Christian family. Calls will neither be made nor received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term. Excitement and change of scene are opposed to that quiet thoughtfulness which belongs to holy time.

APPENDIX.

It is our endeavor so to educate girls that they may mature into healthful, cultivated, earnest, Christian womanhood.

Whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of the Principal.

Pupils entering school will be admitted to studies beyond the Junior Year by passing a satisfactory private examination in the more important fundamental branches.

Instruction is regularly given in Reading, Spelling, Penmanship, and Calisthenics, or Gymnastics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

One day in each week is devoted to English Composition, and general exercises in Mental Arithmetic, Parsing, Geography, or History. With these are combined reports upon miscellaneous topics previously assigned, whose object it is to promote general intelligence, and to establish habits of investigation.

While we insist on prime attention to the essentials of an education, we are able to offer superior advantages in music, painting, and the languages.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who expect to be connected with the School for any considerable time should be present consecutive terms.

The importance of prompt attendance and uninterrupted regularity cannot be over-estimated. Absence from a single recitation is a misfortune.

The friends of the Academy will always be welcome at our recitations.

Young ladies from abroad can, by early application, find pleasant accommodations at Smith Hall with their teachers, whose care it will be not only to make them happy, but to cultivate in them ladylike habits. Those who are studying French sit with their teacher at table, where they converse in that language only.

The members of a school have no time for general society, as it would interfere with the main object of their association. The young ladies at Smith Hall are at leisure, however, to receive their friends upon Wednesday, which is their recreation-day, and at any other times, excepting study hours.

The Sabbath will be observed as in any other Christian family. Calls will neither be made nor received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term, as we consider excitement and change of scene opposed to that quiet thoughtfulness which belongs to holy time.

COURSE OF STUDY.

The English course is arranged to occupy four years; and should attention be paid to the languages, a longer time will be necessary. *Young* girls, or those in delicate health, may often find the course prescribed for one year more than can be profitably completed in the time. Too great haste in passing over the foundation studies is felt as a depressing influence throughout the entire course.

APPENDIX.

It is our endeavor so to educate girls that they may mature into healthful, cultivated, earnest Christian womanhood.

Whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of the Principal.

Pupils entering school will be admitted to studies beyond the Junior Year only by passing a satisfactory private examination in the more important fundamental branches.

Every one will be required to take Arithmetic as one of her English studies, who does not prove herself already well acquainted with it.

Instruction is given in Reading, Spelling, Penmanship, and Gymnastics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

One day in each week is devoted to English Composition, and general exercises in Mental Arithmetic, Parsing, Geography, or History. With these are combined reports upon miscellaneous topics previously assigned, whose object it is to promote general intelligence, and to establish habits of investigation.

While we insist on prime attention to the essentials of an education, we are able to offer superior advantages in music, painting, and the languages.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who intend to be connected with the School for any considerable time should be present consecutive terms.

The importance of prompt attendance and uninterrupted regularity cannot be over-estimated. Absence from a single recitation is a misfortune.

The friends of the Academy will always be welcome at our recitations.

Young ladies from abroad can, by early application, find pleasant accommodations at Smith or Davis Hall with their teachers, whose care it will be not only to make them happy, but to cultivate in them ladylike habits. Those who are studying French sit with their teacher at table, where they converse in that language only.

The members of a school have no time for general society, as it would interfere with the main object of their association. The young ladies at Smith and Davis Halls are at leisure, however, to receive their friends upon Wednesday, which is their recreation-day, and at any other times, excepting study hours.

The Sabbath will be observed as in any other Christian family. Calls will neither be made nor received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term, as we consider excitement and change of scene opposed to that quiet thoughtfulness which belongs to holy time.

A report of each pupil's standing in her classes and general deportment will be sent to her parents or guardians in the course of every term.

Appendix.

It is our endeavor so to educate girls that they may mature into healthful, cultivated, earnest Christian womanhood.

Whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of the Principal.

Pupils entering school will be admitted to studies beyond the Junior Year only by passing a satisfactory private examination in the more important fundamental branches.

Every one will be required to take Arithmetic as one of her English studies, who does not prove herself already well acquainted with it.

Instruction is given in Reading, Spelling, Penmanship, and Gymnastics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

One day in each week is devoted to English Composition, and general exercises in Mental Arithmetic, Parsing, Geography, or History. With these are combined reports upon miscellaneous topics previously assigned, whose object it is to promote general intelligence, and to establish habits of investigation.

While we insist on prime attention to the essentials of an education, we are able to offer superior advantages in music, painting, and the languages. Young ladies at Smith Hall, who are studying French, sit with their teacher at table, where they converse in that language only.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who intend to be connected with the School for any considerable time should be present consecutive terms.

The importance of prompt attendance and uninterrupted regularity will be strongly insisted upon. Absence from a single recitation is a misfortune.

The friends of the Academy are always welcome at our recitations.

Young ladies from abroad can, by early application, find pleasant accommodations at some one of our Halls with their teachers, whose care it will be, not only to make them happy, but to cultivate in them ladylike habits. As our applications considerably exceed our means of accommodation, we shall give the preference among our old scholars, to those who have proved themselves to have the health, ability, and disposition, to do well in all respects.

New scholars will be accepted according to the date of their application, unless some special reason appears to the contrary.

The members of a school have no time for general society, as it would inter-

fere with the main object of their association. The young ladies are at leisure, however, to receive their friends upon Wednesday, which is their recreation-day, and at any other times, excepting study hours.

The Sabbath will be observed as in any other Christian family. Calls will neither be made or received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term, as we consider excitement and change of scene opposed to that quiet thoughtfulness which belongs to holy time.

A report of each pupil's standing in her classes and general deportment will be sent to her parents or guardians in the course of every term.

APPENDIX.

It is our endeavor so to educate girls that they may mature into healthful, cultivated, earnest Christian womanhood.

Whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of the Principal.

Instruction is given in Reading, Spelling, Penmanship, and Gymnastics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

Every Saturday is devoted to miscellaneous literary exercises, adapted to promote general intelligence, and to establish habits of investigation.

While we insist on prime attention to the essentials of an education, we are able to offer superior advantages in music, painting, and the languages.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who intend to be connected with the School for any considerable time should be present consecutive terms.

Members of the school must be prompt and regular in their attendance. If not present at the very beginning of the term, they will forfeit their places, unless permission to be tardy shall have been obtained of the Principal.

The friends of the Academy are always welcome at our recitations.

Young ladies from abroad can, by early application, find pleasant accommodations at some one of our Halls with their teachers, whose care it will be, not only to make them happy, but to cultivate in them ladylike habits. As our applications considerably exceed our means of accommodation, we shall give the preference among our old scholars, to those who have proved themselves to have the health, ability, and disposition to do well in all respects.

New scholars will be accepted according to the date of their application, unless some special reason appears to the contrary.

The members of a school have little time for general society, as it would interfere with the main object of their association. The young ladies are at leisure however, to receive their friends upon Wednesday, which is their recreation day, and at any other times, excepting study hours.

The Sabbath will be observed as in any other Christian family. Calls will neither be made or received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term, as we consider excitement and change of scene opposed to that quiet thoughtfulness which belongs to holy time.

A report of each pupil's standing in her classes and general deportment will be sent to her parents or guardians in the course of every term.

APPENDIX.

It is our endeavor so to educate girls that they may mature into healthful, cultivated, earnest Christian womanhood.

Whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of the Principal.

Instruction is given in Reading, Spelling, Penmanship, and Gymnastics.

Ancient Geography will be taught in connection with the study of the Bible, Ancient and Ecclesiastical History, and the Latin.

Every Saturday is devoted to miscellaneous literary exercises, adapted to promote general intelligence, and to establish habits of investigation.

Those studying French have opportunity to board with their teacher at South Hall, where that is the only language spoken at the table.

While we insist on prime attention to the essentials of an education, we are able to offer superior advantages in music, painting, and the languages.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who intend to be connected with the School for any considerable time should be present consecutive terms.

Members of the school must be prompt and regular in their attendance. If not present at the very beginning of the term, they will forfeit their places, unless permission to be tardy shall have been obtained of the Principal.

The friends of the Academy are always welcome at our recitations.

Young ladies from abroad can, by early application, find pleasant accommodations at some one of our Halls with their teachers, whose care it will be, not only to make them happy, but to cultivate in them ladylike habits. As our applications considerably exceed our means of accommodation, we shall give the preference among our old scholars, to those who have proved themselves to have the health, ability, and disposition to do well in all respects.

New scholars will be accepted according to the date of their application, unless some special reason appears to the contrary.

The members of a school have little time for general society, as it would interfere with the main object of their association. The young ladies are at leisure however, to receive their friends upon Wednesday, which is their recreation day, and at any other times, excepting study hours.

The Sabbath will be observed as in any other Christian family. Calls will neither be made or received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term, as we consider excitement and change of scene opposed to that quiet thoughtfulness which belongs to holy time.

A report of each pupil's standing in her classes and general deportment will be sent to her parents or guardians in the course of every term.

Scholars leaving school, except for sickness, after having registered their names, will be charged for the bills of the term.

Application for admission and board should be made to the Principal, Miss McKeen, and should be accompanied with such information as may be of service in making the best arrangements for the literary, social, and moral welfare of the pupil. It should also be stated whether, in case she cannot be received at once, she wishes to be entered as a candidate for a vacancy, such as is liable to occur at any time during the term. In case of a failure after an engagement has been made, information should be given immediately.

Public examinations at the close of the present year will commence on Monday, A.M., June 28, and be completed Thursday, A.M., July 1.

APPENDIX.

It is our endeavor so to educate girls that they may mature into healthful, cultivated, earnest Christian womanhood.

Young ladies from abroad can, by early application, find pleasant accommodations at some one of our Halls with their teachers, whose care it will be, not only to make them happy, but to cultivate in them ladylike habits.

While we insist on prime attention to the essentials of an education, we are able also to offer superior instruction in music, painting, and the languages. Those studying French have opportunity to board with their teacher at one of our Halls, where that is the only language spoken at the table.

The School enjoys various incidental advantages through the courtesy of the other literary institutions in the same place; while easy access to Boston brings within its reach fine music, picture-galleries, and illustrations of science. Classes in Zoölogy and Geology are taken by their teachers to visit the Natural History Rooms in the city, or Agassiz's Museum at Cambridge; those in Physiology are made welcome by one of the professors of the New England Female Medical College, occasionally, to her lecture-room, where they may examine preparations and models with the benefit of her instructions.

Whether young ladies are to remain in school a longer or a shorter time, their studies will be assigned according to the judgment of the Principal.

No scholar will be received who does not expect to remain through the term. It is very desirable that those who intend to be connected with the Academy for any considerable time should be present consecutive terms. Members of the school must be prompt and regular in their attendance. If absent at the opening of the term, without permission of the Principal, they will forfeit their places.

The friends of the Academy are always welcome at our recitations.

New pupils will be accepted according to the date of their application, unless some special reason appears to the contrary.

The members of a school have little time for general society, as it would interfere with the main object of their association. The young ladies are at leisure however, to receive or visit their friends upon Wednesday, which is their recreation day, and at other times, out of study hours.

Every Saturday is devoted to miscellaneous literary exercises, adapted to promote general intelligence, and to establish habits of investigation.

The Sabbath will be observed as in any other Christian family. Calls will neither be made or received on that day. Unless providentially called away, no young lady will be absent from her home here a single Sabbath during the term, as we consider excitement and change of scene opposed to that quiet thoughtfulness which belongs to holy time.

A report of each pupil's standing in her classes and general deportment will be sent to her parents or guardians in the course of every term.
